

21st Century Instructional Initiative Grant Recipients 2016-2017

Math Matters

**Martin Boulevard Elementary
School**

**Janet Mahoney, Principal
Kristin Kraus, Grant Liaison**

STEM Focus

"Imathimation" encouraged students to think outside the box and to envision ways in which math affects their lives every day. Playing on ordinary situations in cooking, shopping, music, and a variety of other areas in order to motivate students to see the math all around them, not just in math or science class.

- Data analysis skills
- Mathematical vocabulary
- Real-world communication through mathematics

Martin Boulevard Elementary's fifth grade representative won 3rd place in the BCPS STEM Fair, and our fourth grade representative won 1st place in the BCPS STEM Fair. Without the support of the Education Foundation, this accomplishment would not be possible.
