

21st Century Instructional Initiative Grant Recipients 2016-2017

The Eagle's Nest TV Studio 2.0

Elmwood Elementary School

Jeffrey Hogan, Principal
Hilary Graquette, Grant Liaison

STEM Focus & Global Awareness

Segments like our Math-tastic Monday was utilized to use "fast facts" that kids were learning or had learned in their home rooms. It is a chance to get students to think about math, out sided of the standard math block. The Environmental Tip Tuesday, allowed the kids from the afterschool club, to come up with tips that they could share with the rest of the Elmwood community. It is allowing those kids another chance to work on research and speaking skills outside of the traditional homeroom setting.

- The primary focus for this grant, was to help purchase current equipment aligned with the standards set forth for TV Studios in the BCPS system. Elmwood's equipment had outlived its usefulness, and workability. With a generous donation of a more modern camera, and the funding of other basic AV equipment at the school level, this grant afforded us the opportunity to put the studio "together."
