

21st Century Instructional Initiative Grant Recipients 2016-2017

Winand Elementary School
2017
Family STEAM Night

Winand Elementary School

Debita Basu, Principal
Kelsey Pope, Grant Liaison

STEM Focus

The Winand ES 2017 Family STEAM Night was designed to address several needs and desires of our school and surrounding community. Activities provided by The Maryland Science Center allowed Winand students and their families to engage in meaningful hands on projects that promoted creativity in not only science, but engineering, math, and the arts.

Our students could look at through animal eyes, explore liquids in chemistry, determine how light creates colors, and learn about many different reptiles. Our 5th grade scientists showcased their “inner scientist” with unique projects from various genres including chemistry, physics, and consumer science.
