The Neuroscience of Learning: Home School Connections

Hereford Zone Feeder Pattern/Organizational Effectiveness

Community Nights are part of a larger project: "Zoning in on Expert Learners," a year long professional development experience designed by the 7 STAT/professional development teachers in the Hereford Zone. The Community Nights will focus on helping teachers and parents/caregivers to acquire increased knowledge and skills in the neuroscience of learning and the learner. If parents/caregivers can replicate these strategies and environmental supports at home, students will experience consistency in interactions across multiple settings, which supports the acquisition of skill development.
