

Energy & The Environment

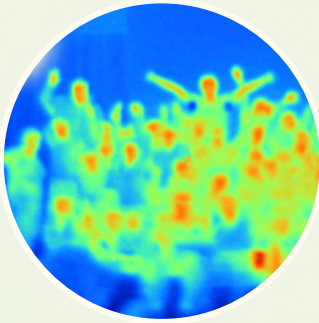

Assemblies

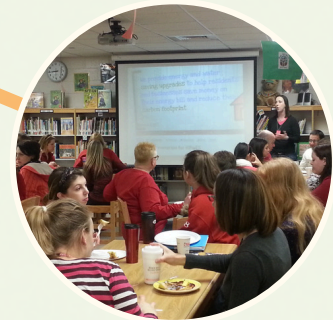

Lesson Plans

STEAM Night

Professional Development

Energy Detective Challenge

OUR Schools partners with Hot Spots to provide fun and educational programming on the importance of STEAM as it relates to environmental literacy. Through assemblies, classroom activities, after school STEAM nights and more, we educate and inspire all members of the school community how they can work together towards healthier and more sustainable communities.

We provide all necessary supplies, training, and support to ensure your school is fully engaged in environmental learning and your Green School Certification.
