

Professional Development

1 Hour PD where teachers learn about food & the environment, while practicing the activities they will lead throughout the program

Assemblies

Two assemblies featuring skits, acrobatics & live music to educate and inspire students towards greener ways of producing and consuming food

Lesson Plans

Hands-on STEAM lessons on hydroponic farming & growing microgreens, lead by teachers with Hot Spots educators providing support

Family Night

An evening of STEAM activities & presentations that students and parents do both together and separately, all around food waste & hydroponic farming

Community Donation Drive

A community donation challenge between classrooms with individual & classroom prizes for community impact
