

## Professional Development

1 Hour PD where teachers learn about energy & the environment while practicing the activities they will lead throughout the program

## Assemblies

Two assemblies featuring skits, acrobatics & live music to educate and inspire students towards STEAM & the environment

## Lesson Plans

Hands-on STEAM lessons on renewable energy, lead by teachers with Hot Spots educators providing classroom support

## STEAM Night

An evening of STEAM activities & presentations that students and parents do both together and separately, all focused around energy efficiency & renewables

## Energy Detective Challenge

An energy savings challenge between classrooms with individual & classroom prizes for environmental impact
