

21st Century Instructional Initiative Grant Recipients 2016-2017

Collaboratory MakerSpace

Warren Elementary School

Jason Barnett, Principal
Madoline Foltz & Susan Wells, Grant Team

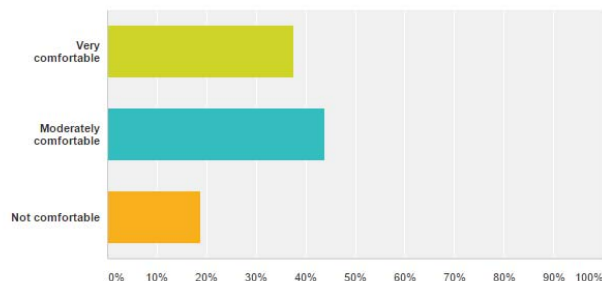

STEM Focus

The core areas targeted for this grant include math, science, language arts, and technology. The projects offered through makerspace activities are multi-faceted and authentically integrate several core subjects, making the delineation of separate subject areas difficult to detect. Students learned and applied skills such as reading for information, using organizational structures in writing, measuring, organizing data, and using technology and materials in a context that was motivating and self-directed.

- Collaboration & Compromise
- Creativity & Innovation
- Design & Function

Are you comfortable creating your own activities/challenges for your students to complete in the MakerSpace?

Answered: 16 Skipped: 0

Answer Choices	Responses	Count
Very comfortable	37.50%	6
Moderately comfortable	43.75%	7
Not comfortable	18.75%	3
Total		16

As a teacher, how many times did you take your class to the MakerSpace each month?
