

Excellence in Education Grant Recipient 2018-2019

Food and Sustainability

Glyndon Elementary School
Tracy Robinson, Principal
Meagan Figola, Grant Liaison
Environmental Literacy, Health Literacy, STEM

Collaboration is key within 21st century learning.

Collaboration among teachers, students, and the community is our focus as we implemented this program sponsored by OURSchools.

- Participants learned the content knowledge necessary for specific tasks and investigations in order to educate themselves and inspire others to work together towards a cleantech-driven sustainable future.
- Students focused on environmental literacy by demonstrating knowledge and understanding of environmental conditions that affect our food sustainability.
- Students took action towards solving problems around our food and the ways we can collaborate to save energy preparing and transporting food.
- Students used Next Generation Science Standards to solve problems around environmental and health literacy while being prompted by
