

# FEATURED PROGRAMS

## About Us

Little Medical School® is a provider of fun and engaging STEM/STEAM educational enrichment programs, bringing medicine, science, and the importance of health to preschool, elementary, and middle school children, through interactive classes, camps, workshops, and special events!

## What We Offer to You

We offer one of a kind opportunities for children to immerse themselves in the fascinating world of medicine where they can explore various healthcare professions.

Our innovative, hands-on curriculum was developed by a team of Board-Certified Physicians, along with experienced Child Educators, and is designed to actively engage and inspire young minds, as they discover how the organ systems of the body work, how to use medical instruments, perform first aid, manage sports injuries, care for animals, write prescriptions, read x-rays, tie knots like a real surgeon, and so much more!

All of our experiences are as fun as they are educational, and support the current initiatives of STEAM- Science, Technology, Engineering, Art, and Math – education. We proudly offer exciting after-school enrichment, summer and break camps, in-school workshops, preschool programs, parties and special events.

little medical school.

Little Medical School - Brings medicine, science, and the importance of health

to children in an entertaining, exciting, and fun way. Children learn and have fun as they dress up like doctors, learn how to use instruments doctors use, and understand how the body works!

Over 15 hours of topics from Little Medical School programs can be customized into full programs, summer camps, or one hour sessions. Besides the academics, kids will also experience traditions and rituals like a real medical school experience.

little veterinarian school

Little Veterinarian School - Encourages students to role play and explore the exciting world of veterinarians. Kids learn how to perform a nose to tail exam like a veterinarian, learn how to take care of pets like cats and dogs, and use instruments that real veterinarians use.

little medical school. sports medicine

Sports Medicine - See what it's like to be an orthopedic surgeon and perform

Tommy John Surgery. Make a model of the hand and see how the tendons and ligaments work. Learn what can go wrong!

As a graduate of Little Medical School you will have a better understanding of what it is like in the world of Sports Medicine!

little medical school. nutrition school

Little Nutrition School - Children assume the role of a dietician and

learn about healthy eating habits, the food pyramid, and global foods.

little medical school. wilderness medicine

Wilderness Medicine - Our program will teach children about some of the

dangers in the wild and how to safely handle a medical situation. Students will learn about snake bites, hypothermia, how to tie a tourniquet, splint a broken leg, filter dirty water, 20 uses of a bandana and how to treat bug bites.

little nursing school.

Little Nursing School - Children will learn how a nurse performs

assessments, learn about shots and vaccinations, blood, surgical nursing, broken bones and more.

little dental school

Little Dental School - Children learn dental anatomy, principles of a

healthy mouth, oral hygiene and home care, and about common dental procedures as children assume the role of a dentist.

little pharmacy school.

Little Pharmacy School - Get your mortar and pestle ready! Learn what

medications are, all about medication safety, what a pharmacist does, pharmacy emergencies, and about calling Poison Control.

little medical school. future pediatrician

Little Medical School Future Pediatricians -

This class takes a new twist on the traditional expectant sibling offerings. Assume the role of a pediatrician, and learn how to perform an exam, feed/burp a baby, learn about immunizations, infant CPR, and more!

medical school 4 teens™

MedSchool4Teens is an advanced medical school for

middle school/high school age students. Students learn about skin, blood and blood disorders, digestive disorders, surgery techniques, how to perform an EKG and heart issues, and the different paths to get into medical school and other healthcare professions.

Educational program for ages 13-18.
