

ELEMENTAL EDUCATION

STEAM IGNITION Programs

STEAM IGNITION programs are designed to reach Elementary Schools and Classrooms. They take place during the school year. Programs last around 1 month, and include interactive Assemblies, Classroom Activities, plus a digital Professional Development Guide, all the Materials the program requires, and friendly Support along the way!

FULL STEAM IGNITION programs are all of this while also including a fun Community Night, where parents, teachers, and students are invited to the school for an evening of activities, learning games, entertaining presentations, guests from the community, and opportunities to be a part of local initiatives to make the world a better place. In addition to this, we'll document the program and share about it and your school to your parents and students, and to our social media.
